

## MYRINGOPLASTY/ TYMPANOPLASTY/ TYMPANOTOMY MASTOIDECTOMY / EXOSTOSIS OSSICULAR CHAIN RECONSTRUCTION

### POST OPERATIVE PROCEDURES

- Your ear **MUST** be kept clean and dry
- You **MUST NOT** get the ear knocked or banged post-operatively
- The outer cotton wool may be changed but the inner ear packing must **NOT** be touched.

#### ***IF THE INNER PACKING FALLS OUT – DO NOT ATTEMPT TO REPLACE IT.***

- There may be a small discharge from the ear – usually clear or slightly blood stained.
- Panadol, Painstop or Panadeine can be given for the pain and discomfort of the ear.
- It is preferable that you **DO NOT** attend school/work until after the next Doctors appointment unless otherwise instructed.

#### ***You will need to contact the rooms to arrange a post-operative appointment within one (1) to two (2) weeks of the operation.***

- Keep reasonably quiet.  
Sport & Swimming is **NOT** permitted.
- Please contact Mr Fisher if there is any abnormal odour or pus discharge or fresh bleeding from the ear.
